### **Violent Crime Response Team Standard Operating Procedures Collecting a Submerged Firearm**

---

#### **10. VCRT Procedures**

#### **10.29 Collecting Submerged Firearm**

##### **10.29.1 Scope**

This procedure provides general guidelines in the collection of a submerged firearm.

##### **10.29.2 Definitions**

Refer to VCRT 11.0 Definitions and Abbreviations

##### **10.29.3 Chemicals and Reagents**

None

##### **10.29.4 Equipment and Supplies**

Packaging materials

##### **10.29.5 Procedure**

Firearms found submerged in water or other liquids should be recovered and packaged submerged in the same water or liquid, with minimal exposure to air, which may accelerate oxidation.

1. The firearm should be made safe, when practical, before being packaged and transferred to the Laboratory's Firearms Unit. Refer to VCRT 10.1 Rendering a Firearm Safe.
2. Do not attempt to dry the firearm.
3. Record all information possible. Refer to VCRT 10.15 Recording Firearms Evidence for additional information.
4. Package the firearm in a watertight container and submerge it in water. It is preferred that the same water is used in which the firearm was discovered.

Label that package appropriately.
